AGC and TOSTEM announce agreement to start talks on alliance for "Window" business

Aiming to standardize high-performance, high-quality "windows" that contribute solutions for climate change

AGC (Asahi Glass Co., Ltd.; Head Office: Tokyo; President: Kazuhiko Ishimura) and TOSTEM (TOSTEM CORPORATION; Head Office: Tokyo; President: Toshio Ohtake) of JS Group have reached a basic agreement today to start talks on a business alliance for the development, manufacture, and sales of a new high-performance, high-quality "window" that integrates glass and sash.

1. Background

In recent years, in response to increasing concerns about the rapid pace of climate change, efforts to reduce CO₂ emissions have been moving into high gear in various countries. As CO₂ emissions from households have been increasing every year in Japan, reducing those CO₂ emissions has become a pressing issue. We believe that enhancing the thermal insulation and solar control of houses is an effective way of reducing CO₂ emissions, because air-conditioning accounts for 30% of household energy consumption. And, because a large proportion of heat enters and leaves a house through openings such as windows, improved thermal insulation and solar control of windows are needed.

AGC, a leading company in Japanese glass market, and TOSTEM, a leading company in Japanese sash market, are committed to providing products and carrying out business activities in ways that consider the environment and help to achieve a sustainable society. AGC and TOSTEM have separately focused on developing and improving the performance of their products. However, we have come to believe that it will be able to contribute further to solving global warming issues if we work together in developing new high-performance, high-quality "windows", and promoting their popularity through efficient manufacturing and sales. Besides, AGC and TOSTEM also believe that it will be able to provide customers reassurance on the performance and quality assurance of products, which have been provided separately for glass and sash, by establishing a comprehensive performance assurance system for "windows" and enhancing the reliability of "windows" in terms of quality.

Against this background, AGC and TOSTEM announce the agreement to start talks on a business alliance for the development, manufacture, and sales of a new high-performance, high-quality "window" that integrates glass and sash.

2. Outline of the basic agreement

Outline of the joint businesses in the alliance on which AGC and TOSTEM have agreed to start talks is as follows.

(1) Windows development business

Through the efficient use of management resources of AGC and TOSTEM, plan and develop high-performance, high-quality "windows", and design performance assurance system for "windows"

(2) Processed glass business

At the initiative of AGC, efficiently manufacture and sell processed glass for "windows".

(3) Windows assembling business

At the initiative of TOSTEM, establish a performance assurance system for "windows", assemble and sell "windows" while streamlining all operations including delivery.

3. Corporate profiles

(1)Corporate Name	Asahi Glass Co., Ltd.	TOSTEM CORPORATION
(2)Location	1-12-1, Yurakucho, Chiyoda-ku,	2-1-1, Ojima, Koto-ku, Tokyo
	Tokyo 100-8405 JAPAN	136-8535 JAPAN
(3)Representative	Representative Director,	Representative Director,
	President Kazuhiko Ishimura	President Toshio Ohtake
(4)Date of	June 1 st , 1950	October 1 st , 2001
foundation		
(5)Capital	90.9 billion yen.	34.6 billion Yen
(6)Main line of	Manufacture and sell glass,	Manufacture and sell housing and
business	electronics products, display	building materials.
	products and chemical products.	

4. Prospects of the joint business

Aiming to start the joint businesses early, AGC and TOSTEM will hold talks to determine details of the business alliance based on the agreement. The joint businesses are expected to start within 2010.
