# NTT DOCOMO to Establish a 5G Consortium in Thailand with Leading Partners

**TOKYO, JAPAN, February 3, 2021** — NTT DOCOMO and an international group of other leading firms jointly announced today that they have signed a basic agreement to establish a consortium to provide 5G solutions, first in Thailand and later in other Asia Pacific countries with the possible inclusion of additional partners. The initial members of the 5G Global Enterprise solution Consortium (5GEC) will be ACTIVIO Inc., AGC Inc., Advanced Wireless Network Co., Ltd., EXEO ASIA Co., Ltd., FUJITSU LIMITED, Loxley Public Company Limited, Mobile Innovation Co., Ltd., NEC Corporation, NEC Networks & System Integration Corporation, NTT Communications, NTT DATA INSTITUTE OF MANAGEMENT CONSULTING, Inc., NTT DOCOMO, INC., and NTT Ltd.

As global enterprises digitally transform their overseas operations, the consortium's mission, by coordinating each member's strength such as advantages in network technologies or sales and marketing networks, will be to provide such companies with professional consultation regarding 5G solutions, especially flexible and highly secure private 5G networks that function independently of public networks offered by local telecommunications operators. Through the consortium, the participating members will offer the one-stop delivery of private 5G systems and related managed services, capitalizing on the key characteristics of 5G, including Enhanced Mobile Broadband (eMBB), Ultra Reliable Low Latency Communications (URLLC) and Massive Machine Type Communications (mMTC).

Demonstration tests are planned in Thailand in the second half of this year. Commercial services are expected to launch in 2022, targeting vertical industries such as manufacturing and construction companies based in Thailand. Thereafter, the partnership plans to expand into other markets, especially in the Asia-Pacific region where many manufacturing companies with high needs for digital transformation are located.

The consortium will draw on NTT DOCOMO's pioneering leadership in Open Radio Access Network (O-RAN), high expandability and open interfaces to support various mobile frequencies in each country and connect devices provided by various vendors. As a result, the consortium expects to provide users with highly flexible and optimized private 5G networks.

The consortium looks forward to resolving societal and business issues by way of providing world-class 5G private-wireless services, and hopes to contribute to realize a rich society by advancing the digital transformation of companies with business units abroad.

# **Consortium Details**

# 1. Consortium Name :

5G Global Enterprise solution Consortium (5GEC)

2. Roles of Consortium Members

	r	
ACTIVIO	Applications for certification of radio equipment and import, arrangement of certification labeling and acquisition of radio business license	
AGC	Provision of thin, small-footprint, advanced- design proprietary antenna products and improvement of indoor-coverage solutions, mainly for mm-Wave	
Advanced Wireless Network Co., Ltd.	Provision of network connectivity	
EXEO ASIA	Construction of network infrastructure including RAN	
FUJITSU	Provision of and verification support for network communication equipment and solutions	
Loxley	System integration & engineering	
Mobile Innovation	Support for building customer channels	
NEC	Provision of and verification support for network communication equipment and solutions (NEC) Network design and construction, maintenance and operation (NEC Networks & System Integration Corporation)	
NTT Communications	Development of customer channels	
NTT DATA INSTITUTE OF MANAGEMENT CONSULTING	Support for developing customer channels and solution discovery	
NTT DOCOMO	Project coordination, 5G Solution, Design of wireless networks and Integration of O-RAN compliant equipment	
NTT Ltd.	Development of customer channels
