

**AGC Group Achieves Cradle to Cradle Certified® Product Standard  
for Float & Coated Glass Products in Asia**

Tokyo, September 5, 2024— [AGC Glass Asia Pacific](#)'s float and coated glass range has been awarded the Cradle to Cradle Certified® Bronze\*<sup>1</sup>. This certification covers float and coated glass products manufactured by two AGC Group companies in Asia, PT Asahimas Flat Glass Tbk and AGC Float Glass (Thailand) Plc., and follows the existing certification of the [Mirox MNGE](#) product range.

The float and coated glass product range underwent a thorough evaluation against five key assessment criteria categories: Material Health, Material Reutilization, Renewable Energy, Water Stewardship and Social fairness. This certification validates not only the product's sustainability credentials but also contributes to the acquisition of Green Building Certifications such as LEED, WELL, and Green Star (Australia).

The AGC Group has defined "three social values" to be created through its products and technologies in its medium-term management plan, [AGC plus-2026](#). Among them, "Blue planet" aims to contribute to the sustainability of the global environment through product optimization and innovation. We are proud to announce that our float and coated glass product range have now earned Cradle to Cradle Certified®\*<sup>2</sup>, following [EPD](#)\*<sup>3</sup> verification in 2022. The Group is reinforcing its commitment to promoting sustainable practices in the construction industry.

<Notes>

\*<sup>1</sup> This certification is based on version 3.1.
